Composites employment in Winona is more than 30 times what would be normally expected in a community of that size. Much of that employment can be traced back to a few local entrepreneurs. Many companies were launched when someone at an existing company developed a new process or technology, hoping to gain a competitive advantage. Business partners, their employees and others with some connection to important figures in the Winona area composites industry have developed or spun off more than a dozen composites companies.

Minnesota economic TRENDS December 2009
